Walther G22

£149.00

Witney

DESCRIPTION

The Walther G22 is a bullpup-style rifle known for its distinctive and compact design. Although ambidextrous, this one is configured for right hand shooters and can not be used in the left hand. The bullpup configuration results in a shorter overall length while maintaining a useful barrel length for accuracy. This rifle is often favoured for recreational shooting and small game hunting due to its unique ergonomics and lightweight construction.
